

The New Jersey Department of Agriculture
Organic Handling Certification

The New Jersey Department of Agriculture's Organic Certification Program has visited this operation and evaluated methods of production, processing, handling, recordkeeping and reports from an organic field inspector. NJDA has determined that this operation is capable of maintaining the integrity of certified organic production and/or handling, as noted below, under the National Organic Program regulations, 7 CFR Part 205. This operation must file an annual update and undergo an annual update inspection to continue organic certification.
